

# CLOUD LICENCES

There are two ways that a Cloud service can be purchased. Schools can purchase licences or students can purchase licences and then 'link' them to their school.

## School Licences

Many schools wish to purchase enough licences to cover all their students in one simple transaction.

When the service is activated each instructor will receive an email with their login details and download links. Students can then be enrolled in the system, and emailed with their login details and download links.

## Student Licences

If you would like your students to purchase then the first step is to apply for a Cloud service. If your application is successful, your nominated instructors will receive email with login details and download links.

We then set a PIN that students will use when linking to the new Cloud service; this is emailed to you. Once this is done, students can purchase their licences from our website, campus bookstore or an authorised reseller.

If students purchase via our website, registration is automatic, with no serial numbers. Otherwise, they receive a serial number which they register on our website to 'link' to the correct cloud service.

We email students their login details, website urls, and download links in both cases.

If your service is connected to your LMS, students will be prompted to purchase the first time they use the software. No serial numbers are issued and registration is not required.

## Getting Started

Simply fill out the form at the following url, where you can choose all the required options. Don't worry if you're not sure about the type of licensing - you can always decide that later.
